

LMOL Report for 2018-06-25

Contact: G. Gronoff

LMOL Team: W. Carrion, T. Berkoff, J. Sparrow, G. Gronoff

Operator for the day: W. Carrion, J. Sparrow

LMOL / Lidar

The Lidar performed nominally. A few clouds mid-day affect the data.

LMOL / Weather Station and Ground O3

The POM data are to be validated: they are generally lower than the NOAA data, but whether it is from the instrumentation/tubing or from the location (lower altitude, shade) remains to be solved.

The Weather station performed nominally until the power outage.
